

## 2016 Postdoctoral Educators Workshop Making Better Periodontists: Improving Resident Assessment Small Group Discussion Outcomes: Interactive Session 1

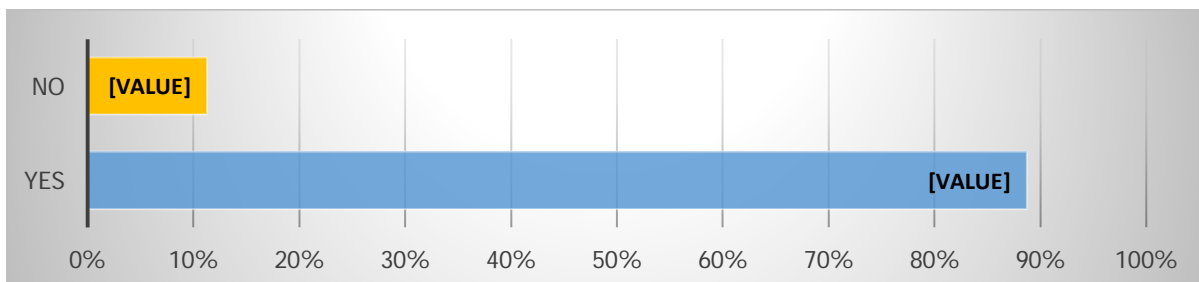

At the 2016 Postdoctoral Educators Workshop, attendees completed an anonymous questionnaire to determine the current state of periodontal programs with respect to surgical skill assessment of residents.

62 submissions were collected, and their transcribed responses are presented below.

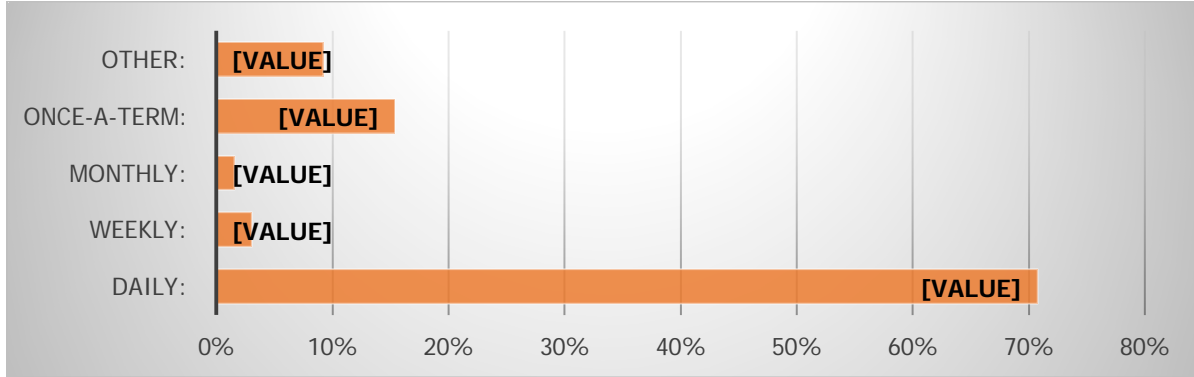

1. Are you serving as the Director of a Periodontics Advanced Education Program?

2. As attending faculty, do you spend at least one day (two half-day clinic sessions) per week supervising periodontal residents?

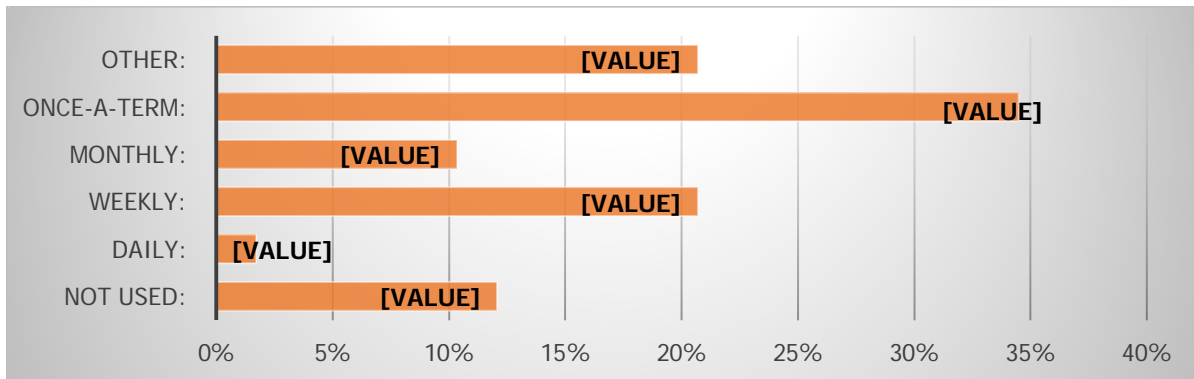

3. In your program, how frequently are the residents' surgical skills evaluated?

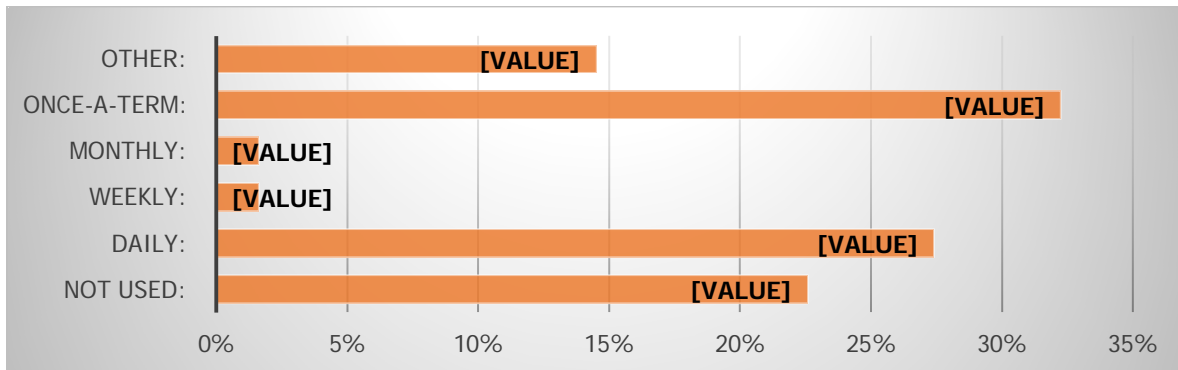

4. How frequently are the following assessment methods used to evaluate residents' surgical skills?

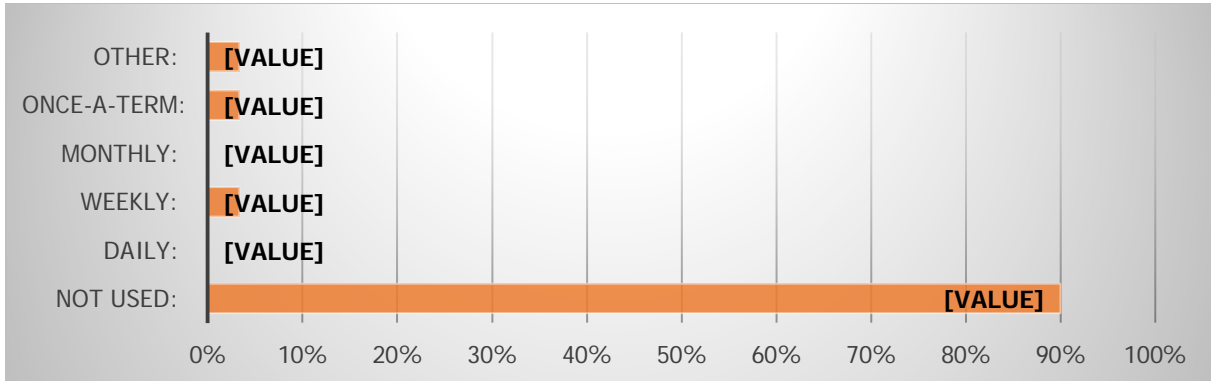

i. Checklist generated by individual instructors

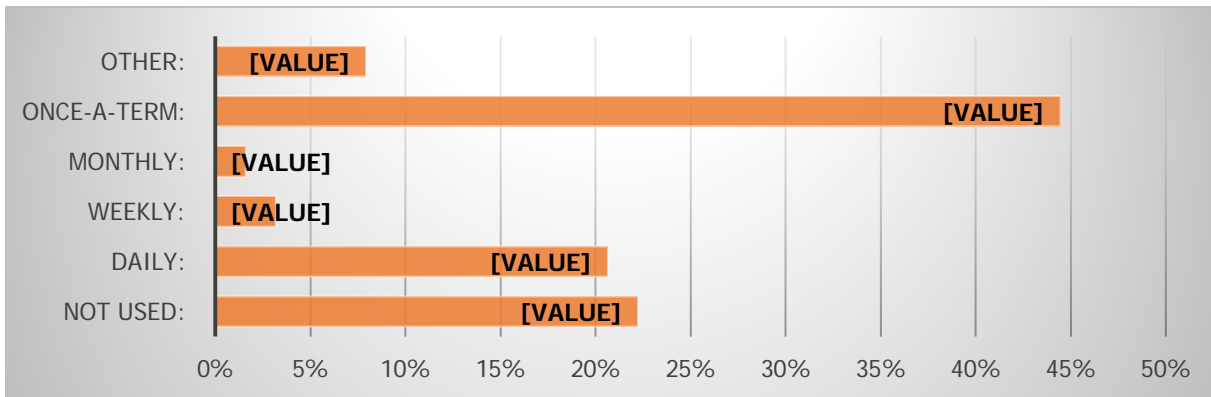

ii. Standard checklist developed at program level

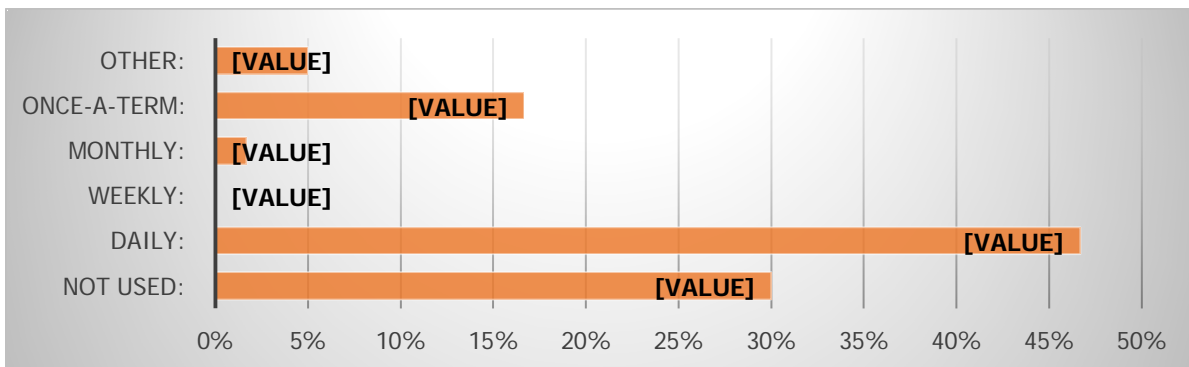

iii. Standard checklist generated by the AAP or CAP

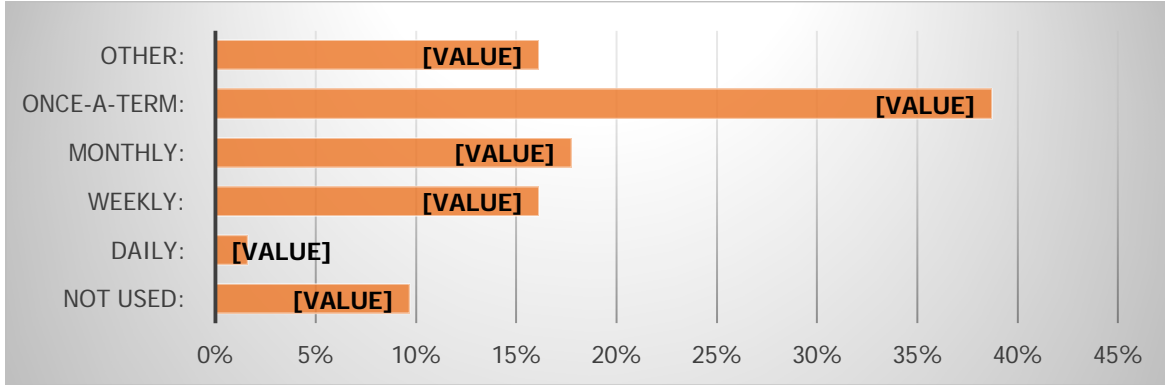

iv. Assessment tool combining a checklist and qualitative comments

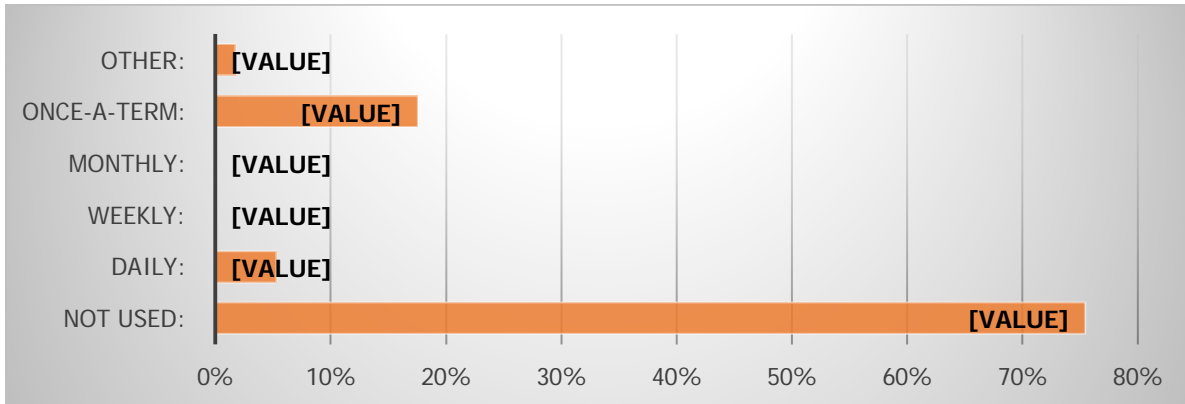

v. Qualitative comments only

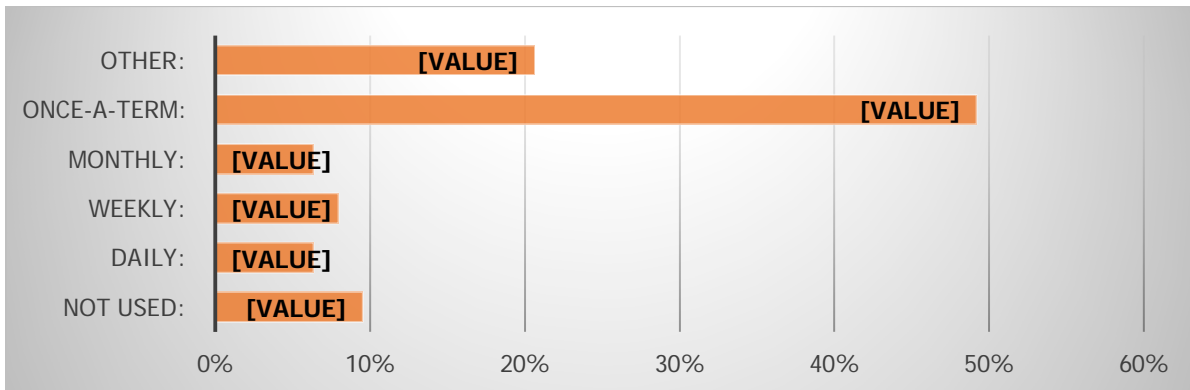

vi. Case report submission

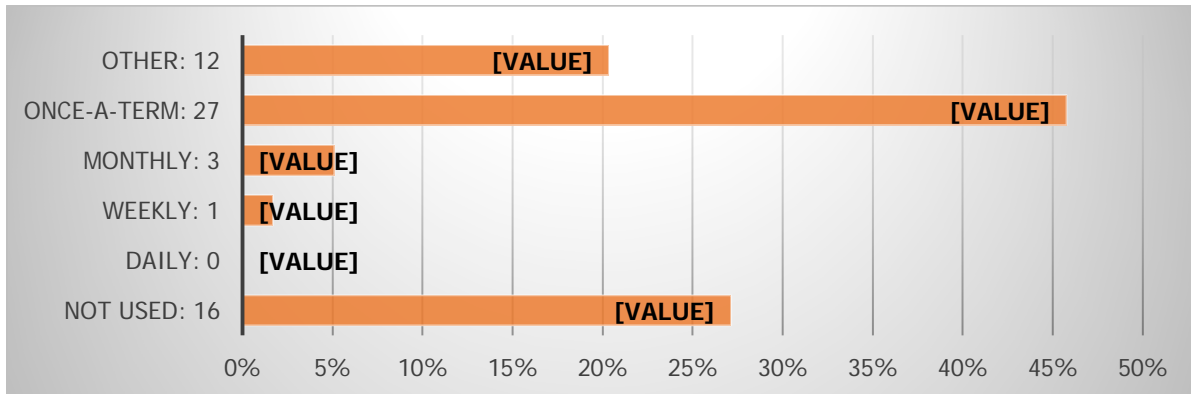

vii. Objective structured clinical examination (OSCE)

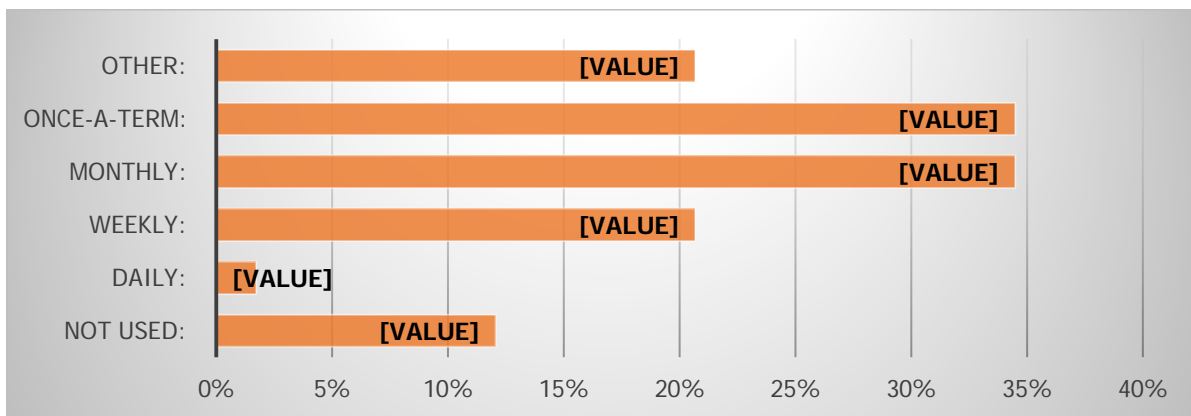

viii. Oral examination

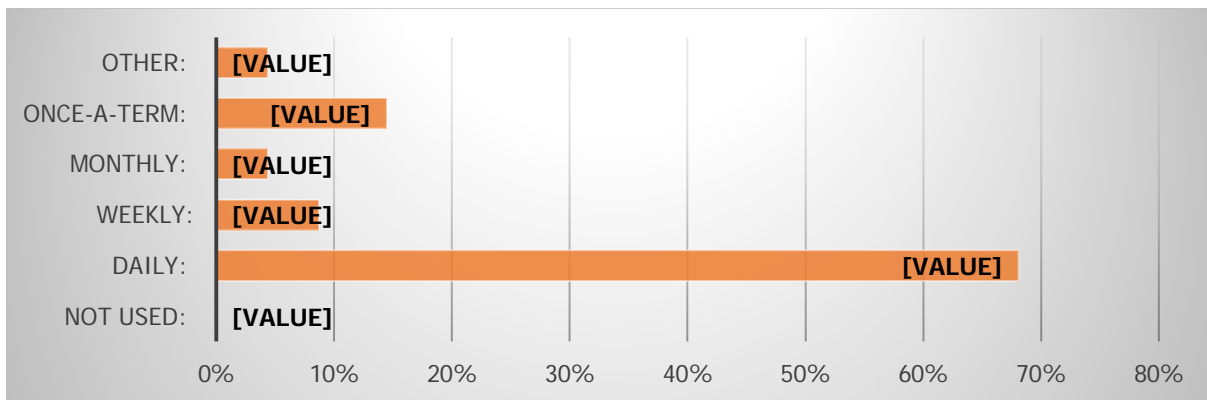

ix. Written examination

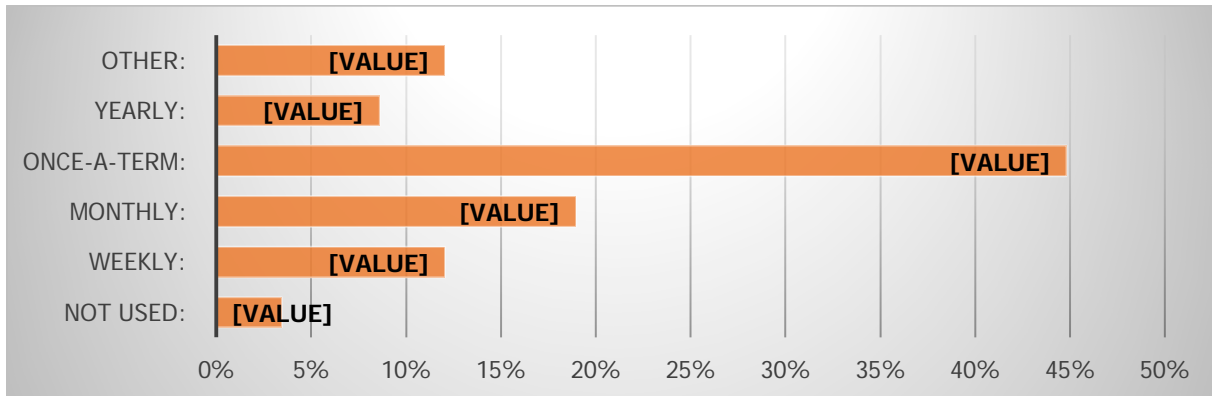

x. Case-based examination

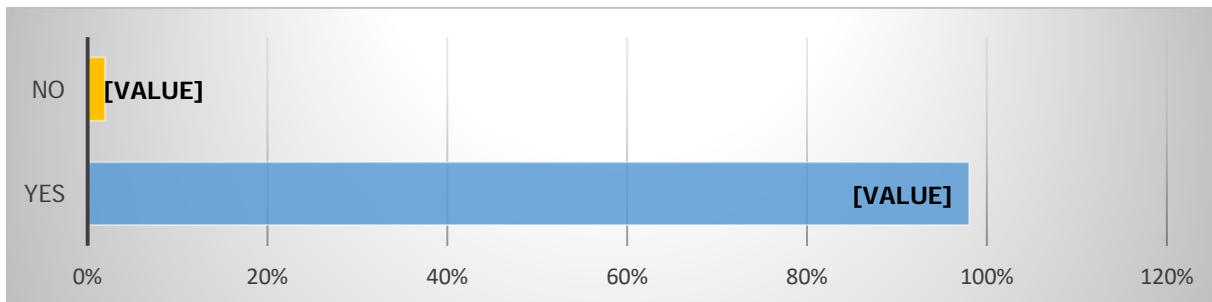

5. How frequently do residents receive one-on-one verbal feedback on their surgical skills?

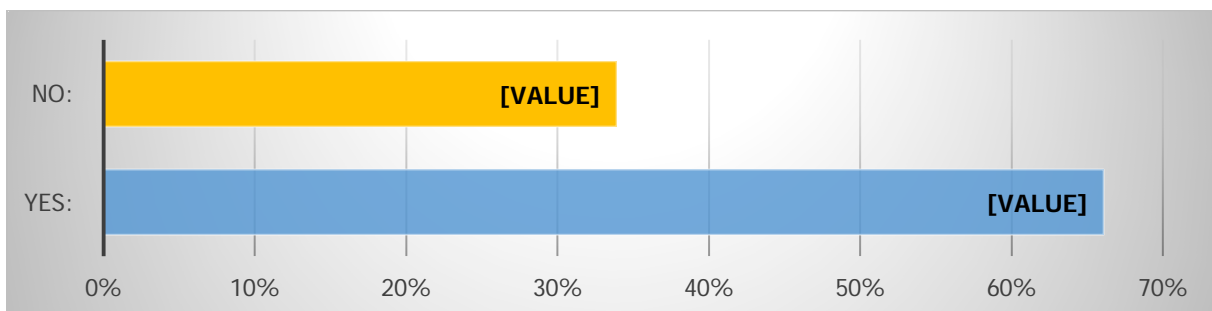

6. How frequently do instructors meet as a group to discuss residents' surgical skills?

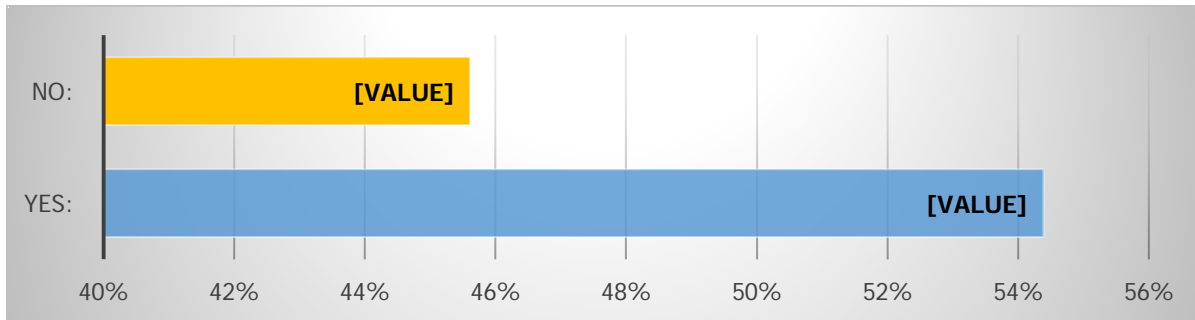

7. As attending faculty, do you personally provide verbal feedback to the residents?

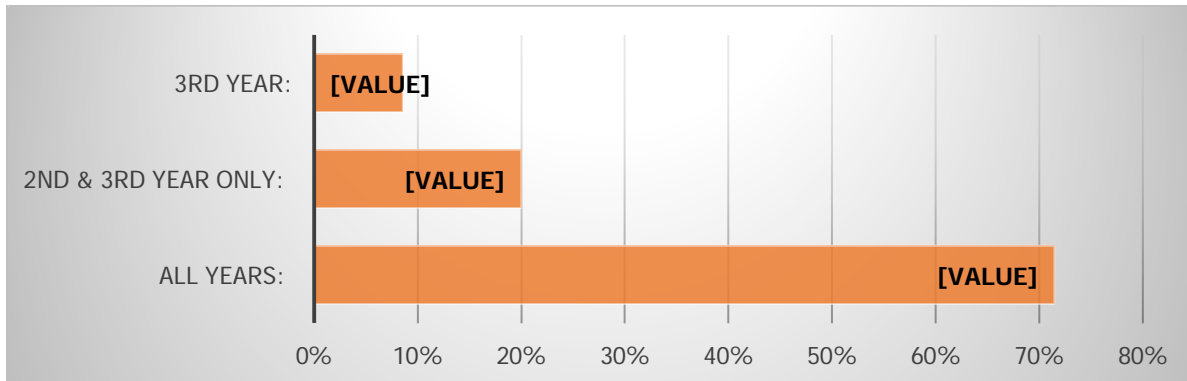

8. As attending faculty, do you personally provide written feedback to the residents?

9. Does your program routinely use procedure-specific competency assessments?

10. If YES, which year residents may take a competency examination?

11. If your program routinely uses procedure-specific competency assessments, please list the surgical procedures for which residents are being assessed.
