

## **American Academy of Periodontology List of Recommended Speakers**

**Updated by BOT May 2019**

The American Academy of Periodontology is committed to advancing the health and well-being of the public through excellence in the practice of periodontics. It has initiated an effort to promote better care and health for patients by providing expert information on periodontics to members of the dental team. Continuing education program planners are invited to refer to this list when programming speakers for state, regional or national meetings. AAP members with expertise in the topic areas, experience presenting to general practice and dental hygiene audiences, and familiarity with the Academy's vision for the specialty have been included.

Speakers are encouraged to address the advantages of a collaborative approach to addressing patients' needs. In this way, dental colleagues will benefit from learning how patient care may be improved, be it in the area of periodontal disease treatment, implant placement, or regenerative and esthetic procedures.

Individuals included on the list are under no obligation to accept offers to speak. In addition, it is not the Academy's intent to provide financial support for either travel expenses or honorarium. All scheduling and financial arrangements are made between the individual and the organization extending the invitation to speak. This list is updated annually. The speakers are listed by topic and in alphabetical order.

**DISCLAIMER:** This AAP List of Recommended Speakers has been generated to facilitate contact between groups programming continuing education speakers and potential speakers who are members of the Academy; it is not intended to be all inclusive. The Academy accepts no responsibility for the accuracy of information or expertise provided by individual speakers; nor does the Academy in any way represent or warrant that the individuals included on this list are in a position that they can, or will, be able to serve as speakers to groups programming continuing education sessions.

Questions regarding this initiative should be directed to the Continuing Education department at [continuingeducation@perio.org](mailto:continuingeducation@perio.org).
